

01 NOVI CORPUS · ARC ACCELERATOR · DEMO DAY

A legal body for your AI agent.

A real company, a USDC treasury on Arc with rules the agent cannot break, and a verified human who answers for it.

02 THE PROBLEM

An agent can hold money. Legally, it is nobody.

TECHNOLOGY SOLVED THIS

wallet ●

autonomy ●

spending policies ●

the missing layer

NO TECHNOLOGY PROVIDES IT

limited liability ○

can sign contracts ○

legal recourse ○

No business hires a counterparty nobody answers for. That is where agentic commerce stalls.

03 WHO IS BUILDING IT

Three builders, three angles.

Martin Barral FRENCH

PRODUCT · BACKEND ARCHITECTURE

Four years backend engineering at **Akuiteo**, contributor to **DefiLlama**, on Arc since January.

Alex Nesta AMERICAN

CONTRACTS · AGENTIC SYSTEMS · SECURITY

Second place at **ETHDenver 2026** with an autonomous DeFi agent. Five years hardening classified systems at **Raytheon**.

Jean-Baptiste Demenet FRENCH

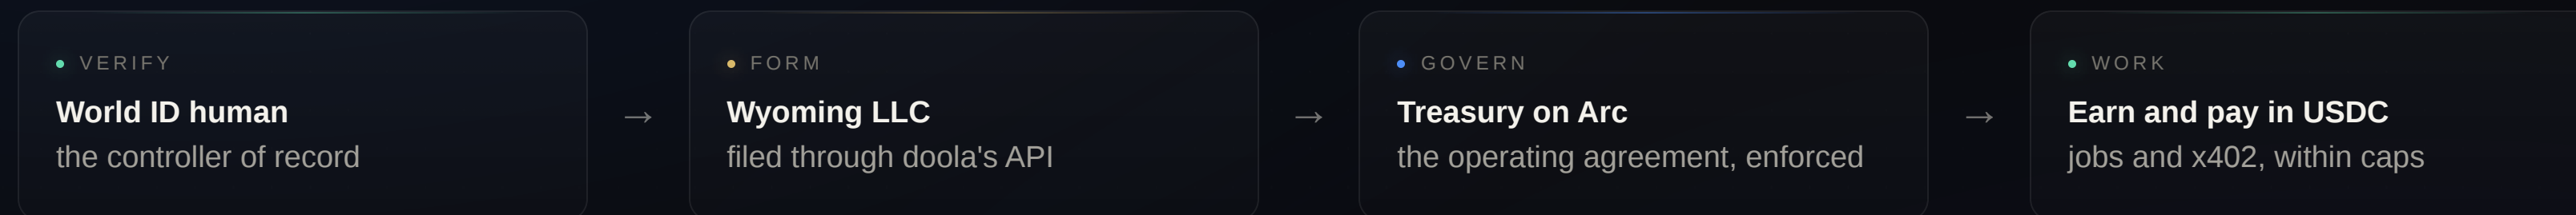

FRONTEND

Seven years in DeFi. Led frontend on **Vesu** on Starknet and **Pangolin** at \$400M TVL.

04 WHAT WE BUILT · LIVE ON ARC TESTNET

One flow: agent to company.

15

AGENT ENTITIES ON ARC

100%

BACKED BY A VERIFIED HUMAN

0

GAS HELD BY ANY AGENT

Every entity is public at novicorpus.com/transparency, every contract source-verified on Arcscan.

05 BUILT ON ARC, NOT PORTED TO IT

Circle-native end to end.

• USDC on Arc

• Circle Wallets

• Gas Station

• x402, buying and selling

• CCTP

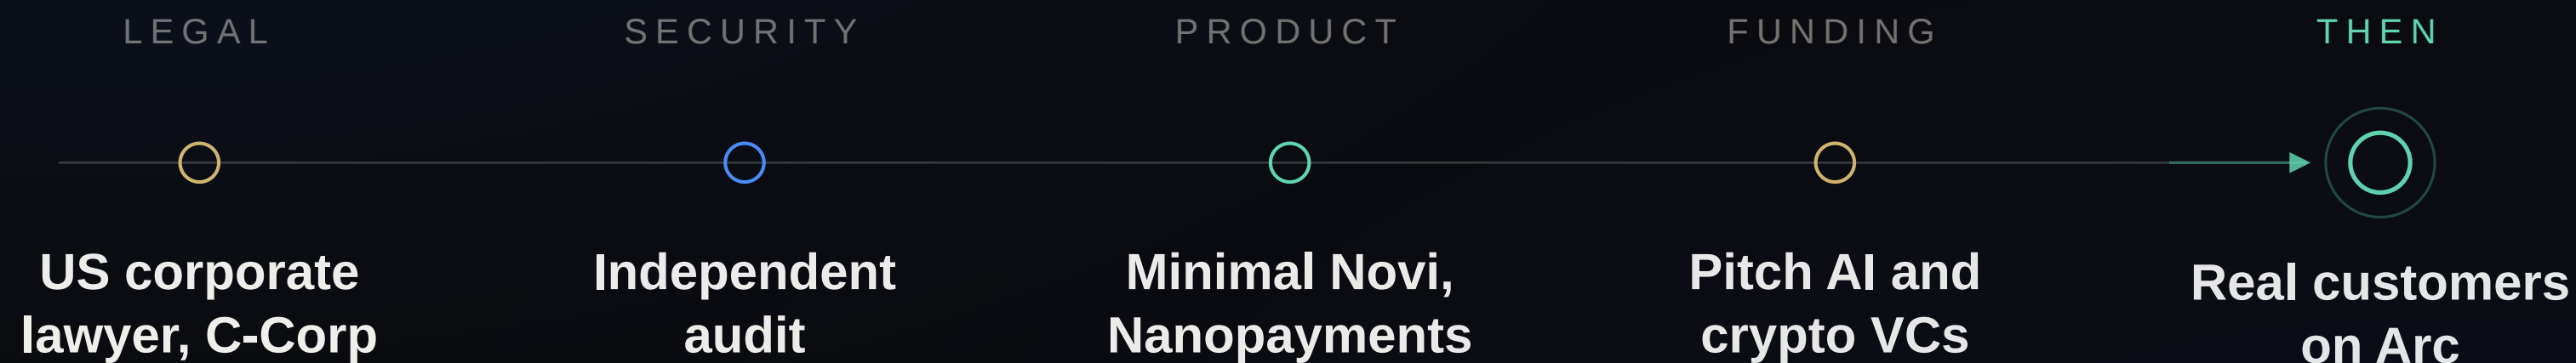

• Gateway

Every treasury, every job, every fee settles in USDC. Agents never hold gas, because **Gas Station sponsors every transaction.**

On mainnet our configuration is Circle-wallets-only by construction. Platform authority sits behind one governance contract, administered from a hardware wallet, with 24/7 on-chain monitoring.

We would rather be right than first.

Nine weeks to turn a working testnet product into **a business that can hold real customer money.**

WHAT WE WANT FROM THE PROGRAMME

People: building alongside Circle and Arc

Counsel: intro to US corporate lawyers

Customers: design partners running agents
